I have industry Job experience of around 1 year. Though from the start of my bachelor's degree, I was interested in developing applications that address real-world problems. I began my journey in technology by learning python and later javascript. I have expertise working with JavaScript/Typescript and ReactJS and NodeJS and I have been involved in developing various applications with these technologies since then..

## Skills

- Javascript | Typescript | Golang | Html | Css
- ReactJs | NextJs | Redux | Recoil | Vuels | NodeJs | ExpressJs | Gatsby | MongoDB | Mysql | Firebase | Jquery
- Frontend | Full-Stack | English – *Professional proficiency*

## Experience

### Software Developer

[Besnik/Uihut](#)

04/2022 - 01/2023

- Led the development team who were responsible for building html templates/themes . The templates are being used in [Ezytor](#) as premade templates.
- Built the frontend of website builder [Ezytor](#) using Laravel blade and ReactJS. That is a premium product that helps developers, build websites faster without concerning the design so that he/she can focus on the functions..
- Built a wordpress plugin [Graphicsly](#) using ReactJs .That helps wordpress developers integrate graphic design into wordpress websites.
- I was responsible for building [Flowgiri](#) and its chrome [extension](#) using ReactJs . This application is used to integrate premade webflow templates in webflow websites.
- Contributed on [Uihut](#) (NuxtJs and adonisJs) development..

### Freelance developer

2019 - 2022

- I used to build freelance projects for the local market and also for a developer, who also worked on projects from upwork clients.

## Education

### Bachelor of Science

[Khulna University](#)

Khulna, Bangladesh
